

LOGESHWARAN M

Computer Science and Engineering Student | Aspiring Java Full Stack Developer

+91-7603993833 | logeshwaranm180@gmail.com | linkedin.com/in/logeshwaranm

SUMMARY

Final-year Computer Science student seeking a Fresher Java Full Stack Developer role. Quick learner with strong adaptability and problem-solving skills, hands-on project experience across Java, Spring Boot, and modern AI-assisted development tools, and a strong interest in building scalable, real-world software solutions.

SKILLS

Languages & Frameworks: Java, Spring Boot, JavaScript, HTML5, CSS3, Bootstrap, Tailwind CSS, XML, C, MySQL, MongoDB

AI Development Tools: Google AI Studio, Antigravity, Supabase, Stitch

Databases: MySQL, MongoDB, Supabase

Deployment & Version Control: GitHub, Vercel, Render, Netlify

Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), REST APIs

PROJECTS

LOKEY-AI

May 2026 – Jun 2026

React, Node.js, TypeScript, AI Integration, Vercel, Render

- Built an AI-powered student assistant that provides personalized academic guidance, study planning, and career support with multilingual capabilities.
- Developed a responsive conversational chat interface with memory to deliver context-aware, natural, and engaging interactions.
- Designed an intuitive user experience to help students clarify doubts, track learning progress, and receive AI-driven recommendations for academic success.

PlanX (V-OS Alpha)

Apr 2026 – May 2026

Kotlin, Jetpack Compose, Room Database, AI-Assisted Development

- Developed an offline-first personal workspace application that helps users manage productivity, notes, finances, fitness, and daily tasks through a unified dashboard.
- Implemented offline voice command support (English & Tamil), local file management, Pomodoro timer, secure note-taking, and personal finance tracking while ensuring user data remains private using local storage and Room Database.
- Designed a modular and customizable workspace interface with draggable productivity widgets, integrating AI-assisted development tools such as ChatGPT, Google AI Studio, and OpenRouter to accelerate UI design, feature planning, debugging, and development workflows.

Stock Trading Platform

Java, Object-Oriented Programming (OOP)

- Created a console-based stock trading simulation using Java.
- Implemented portfolio tracking and stock buy/sell features using core OOP principles.

INTERNSHIP

Java Programming Intern | CodeAlpha

Dec 2025 – Jan 2026

- Strengthened Java programming and problem-solving skills through virtual internship projects.

Java Programming Intern | CodSoft

Sep 2025 – Oct 2025

- Completed a Java programming internship and improved coding logic and development skills.

CERTIFICATIONS

- Junior Grade Typewriting (English) – Government Technical Examinations
- Ideathon 2026 – Participation Certificate
- Machine Learning Workshop – Sona College of Technology | 27 February 2025

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

Graduating: 2027

Mahendra Institute of Technology | CGPA: 8.11 / 10
